

# STAYING ORGANIZED IS EASY WITH HARBORTOUCH RESERVATIONS

Harbortouch Reservations enables restaurants to manage all incoming reservations directly through the Harbortouch POS system or via Apple iPad\*.

This feature allows you to accept reservations online or manually enter the reservations at the point of sale and track them all in one place with a simple and easy-to-use interface. The setup process utilizes a simple drag and drop format so getting started is a snap. Upon setting up your reservations module, you will be provided with a unique URL for customers to make the reservations online.

Similar online reservation systems cost hundreds of dollars a month, but Harbortouch Reservations is yours free of charge with a Harbortouch POS system!

Manage online and manually-entered reservations in one place

Access directly through POS system or via iPad

Simple and easy-to-use interface for maximum efficiency

Drag-and-drop setup process makes creating your table layout a snap

Organize upcoming reservations in the monthly calendar or view a specific night in detail

Easy to add new reservations and see who is currently waiting for a table

Table layout screen shows which tables are open and which are occupied

Text message alerts notify restaurant patrons when their table is ready

Build a customer database for marketing and loyalty programs

\*Merchants must provide their own Apple iPads for Harbortouch Tableside functionality.
